## DESIGN, CABLING & INFRASTRUCTURE

For a smart home to work there first needs to be cables. Using your architectural plans Circle Automation will review your requirements & design a cabling package that meets your requirements.

A quotation will be provided based on the number of points, amount of cable required, and any extra features you want to integrate into your smart home cabling.

Based on the Savant Smart Home Technology Entry Package, to cable a typical 4 bedroom house (2000 Sq Ft) will cost: £3,650

*Prices are exclusive of VAT. If your house is a new build, you may be eligible for 0% VAT on this element of the works.*

Once the cabling is installed & the walls are plastered & painted, our engineers will make a second visit to terminate the cabling around the house & at the system head end. Our engineers will then test the cabling, to ensure that it is capable of passing our rigorous standards.

At this stage, holes are cut into the ceiling for in ceiling speakers, and specialist fire/sound hoods installed to comply with building regulations. The TV aerial and satellite dish will also be installed on the outside of the property.

Based on the Savant Smart Home Technology Entry Package, a guide price for these works is:  
£2,889

*Prices are exclusive of VAT. If your house is a new build, you may be eligible for 0% VAT on this element of the works.*
